

# LinkedIn Job Posting API Requirements

---

If you are not yet a LinkedIn Talent Solutions Partner, please complete the LinkedIn Talent Solutions Partner Request Form @ <https://business.linkedin.com/talent-solutions/ats-partners/partner-application>

## Essential Requirements

### 1. LinkedIn Developer App Credentials

**Purpose:** API authentication

**Provided by:** University IT/HR team

- **Client ID** — OAuth authentication
- **Client Secret** — OAuth authentication

### 2. Company URN

**Purpose:** Identifies university on LinkedIn

**Provided by:** University (from LinkedIn University Page)

- **Format:** `urn:li:company:12345678`
- **Required in every job post**

### 3. Confirmation: Job Posting Product Added

**Purpose:** Enables Job Posting API access

**Provided by:** University (in Developer Portal)

- • Job Posting product must be added to the LinkedIn Developer App

#### 4. Company Contract

**Provided by:** University (From linkedin Recruiter Account)

- • **Format:** `urn:li:contract:12345678`
- • **Required in every premium job post**

Note->If you do not have a contract ID, please reach out to your LinkedIn representative to set up a contract.

Basic Job posting api is capped at one active job at a time, with an overall monthly limits
