---

## SUMMARY

Certified in Google Data Analytics with a Computer Science degree and hands-on backend engineering experience, currently pursuing Microsoft Azure cloud certification. Eagerly seeking full-time opportunities to apply technical expertise and tackle complex challenges.

---

## WORK EXPERIENCE

Feb 2024 - Apr 2024

### Full-stack Developer, Jazzah Aluminum Factory -JAFCO

Throughout my immersive internship experience at JAFCO, I made significant contributions to the development of ERP systems using Laravel framework.

#### Key Contributions:

- Streamlined data management through refined CRUD operations.
- Implemented effective layout organization using Laravel's blade templating engine.
- Utilized JavaScript DOM manipulation to present data elegantly.
- Improved SQL database performance through optimization techniques.
- Collaborated on web app development, leveraging Laravel's capabilities.

Utilized Git for version control and Jira for task management, ensuring efficient collaboration. Engaged in collaborative web application development within the Laravel framework, gaining valuable hands-on experience in backend development.

---

## EDUCATION

### Bachelor of Computer Science

Jan 2021 - May 2024

Arab Open University

- Relevant work: At Arab Open University, I mentored students in programming projects and courses, providing direct support and sharing practical knowledge to enhance their learning.

---
